## CLWA Labour Day Weekend Fishing Derby

The Crowe Lake Waterway Association will run a fishing derby for our Members and their family and friends over the Labour Day long weekend. This tournament will be a little different than the norm in that there will be no weigh in or a need to keep the fish caught. Details are in an article on [page 3...](#)

## Marmora's 200th Anniversary

The 200th Anniversary of Marmora Event will take place on **Saturday, July 30, 2022**. Last March, the Municipal 200th Anniversary of Marmora Event was postponed due to Covid.

## Events

<b>Breakfast</b>	<b>10am - 12pm</b>	Community Centre, Upstairs
<b>Family Activities</b>	<b>10am - 6pm</b>	Fairgrounds, Food Trucks at the Fairground
<b>Marmora Has Talent</b>	<b>1pm - 3pm</b>	Fairgrounds
<b>Beer Tent</b>	<b>12pm - 11pm</b>	Fairgrounds
<b>Vendor and Crafts Show</b>	<b>9am - 4pm</b>	Community Centre, Arena Floor
<b>Practically Hip Show</b>	<b>8pm - 10pm</b>	Fairgrounds

Commentative T-shirts, hoodies, hats, mugs are being sold to raise funds for the celebration at Broadbent's Home Hardware and City Hall. You can find more information at [www.marmoraandlake.ca](http://www.marmoraandlake.ca)

Summer

Crowe Lake Matters

2022

## President's Message - Jim Nichol

Is this going to be a "normal" summer? Looks like it could be. Things are happening again and we've got a full summer of activity ahead.

The World Famous Lighted Boat Parade and Fireworks on the Lake are on the Canada Day Weekend schedule. The CLWA AGM is planned for August and the September Labour Day Weekend has a new CLWA Member Fishing Derby. Details on all these are in the newsletter.

Marmora and Lake has a busy summer as well. The 200th celebration got postponed for one year due to the pandemic but there is a full day of events for the end of July. There are music weekends, the Fall Agricultural Fair, the #7 Classic Cars on Thursday nights, and the Farmer's Market on Saturday.

We finally got together in person for a Board meeting in April and it was a great opportunity to put faces to names and to meet some of the Board members for the first

time. It is a good group of people working for your organization. Maybe you'd like to join the Board? We always welcome new folks. We also welcome New Members anytime. If your neighbour isn't a member yet, suggest CLWA to them. We have a lot of new people on the lake and they need to know about CLWA.

Right now, I'm getting telephone calls from people wanting my vote for the Provincial election and the Municipal elections will be held in October. This is the time to get involved and to make your voice heard. It would be great to have a waterfront resident on Council. Maybe some of the issues we care about could get on the agenda. Know anybody who wants to run? Are you registered to vote?

Finally, a word about membership. I'm told renewals are coming in very nicely. And lots of people are making the extra donation to be a Gold Star Member. Thank you. It's great to see your commitment and your generosity.

## Fireworks and Boat Parade - July 2nd

The world's greatest Lighted Boat Parade and Fireworks are sponsored by the Crowe Lake Waterway Association and funded by the generosity of our membership.

The Lighted Boat Parade has been in existence for about 10 years and has grown every year. The parade features boats of all types and sizes decorated with many flags, a great variety of lights, signs, music and people having a great time celebrating Canada Day.

The parade route covers the entire lake, forming at the Blairton Lighthouse at approximately 8:30 PM and proceeding along both shores doing a circle by Bayview Park. It ends at Stoney Island to watch a magnificent fireworks display at dusk.

**Boat Parade at 8:30 PM**  
**Fireworks at Dusk**  
**Rain Date Sunday July 3**

# CLWA Members Labour Day Fishing Derby

The Crowe Lake Waterway Association will conduct a fishing derby for our Members and their family and friends over the Labour Day long weekend. This tournament will be a little different than the norm in that there will be no weigh in or a need to keep the fish caught. A picture taken that shows the fish against a ruler and has a publication that shows the date will be submitted electronically to the CLWA website to be entered. Prizes will be awarded for the top 3 longest Bass, as well as 3 mystery length prizes. An entree must include the CLWA members name and address to be considered valid.

## **CLWA Fishing Derby Rules**

The fishing tournament will be open to its members from Friday, September 2nd 12:00 pm to Monday, September 4th 6:00pm. Bass (Rock, Smallmouth and Largemouth Bass) will be the only fish eligible. Live release is encouraged, MNRF keep rules apply.

CLWA members and their family and friends only. Participates must use their own name and a current CLWA members name and address to enter. Anyone may enter as long as they have permission from a current member. Winners will be named along with their CLWA sponsor.

A picture of the fish, which shows the length against a ruler and also includes a print out of a CLWA posted page OR a newspaper, or other medium that proves the date. The posted printout or the newspaper will verify that the fish was caught during derby times. The posted page would be available to print on the CLWA website or from the CLWA Facebook page on Friday September 2nd, at 8:00am. The newspaper (or medium page) must show the publication date. One picture can be used as long as it

shows the length and date. A picture of the entered fish and the angler is also required for our use in our publications. See the examples below. The picture is then forwarded to [info@clwa.ca](mailto:info@clwa.ca) and includes the name of the angler and their CLWA sponsor and address.

Prizes will be awarded for the top 3 lengths, \$100/first, \$75/second, \$50/third and 3 mystery lengths prizes of \$25 each. Prizes will be in the form of a cheque in the CLWA member's name and will be mailed or given to the CLWA member. There is no entry fee. The CLWA member must be in good standing. Anglers may have multiple entrees.

Winners will be posted on our Facebook page (Crowe Lake Waterway Association) and on the CLWA website ([clwa.ca](http://clwa.ca)). By entering, you acknowledge your permission for CLWA to use your photos.

## 2022 AGM Agenda

**When:** Saturday, August 6th 9 AM to Noon

**Where:** Marmora Area Curling Club on Crawford Ave, next to the Community Centre

**What:** Committee Reports, Election of Officers and Directors. refreshments

## Pike Only Fishing Derby - Probably

Chris' Live Bait summer Pike Only Catch 'n Keep Fishing Derby will "probably" be held during the Family Fishing Week in July. Chances are very good that it will happen but check their website <https://www.chrislivebait.com> to get details and the final answer. Should the derby be held, CLWA will again provide prizes of \$100 for the adult category and \$50 for the kids.

2022

# Waterfront Properties On The Crowe

By Guest Scribe: Elinor White

Time to update a Winter 2020-21 Newsletter article on waterfront properties in Ontario for 2022.

Phil Soper, president and CEO of Royal LePage, forecasts double digit jump of 27% in national recreational house price in 2022. Single-family homes in Ontario's recreational property market recorded the highest year-over-year aggregate price appreciation in 2021, rising 34.6%. Experts report an ever-intensive supply shortage of inventory over previous years as the growing demand continues to outpace supply forcing buyers into multiple-offer scenarios.

The 2021 Royal LePage Boomer Survey found that 35 per cent of boomers in Canada said they were considering purchasing a primary residence within the next five years. Of them, more than half (56%) said they were considering buying in a rural or recreational

region, which could result in up to approximately 729,000 people in Ontario entering the recreational real estate market within the five-year period. An overview of the local Peterborough County (Peterborough & the Kawarthas) shows the percent and financial change from 2020 to 2021:

Single-Family home % change  
\$450,000 to \$650,000 = 44%

Single-Family Waterfront % change  
\$690,000 to \$889,000 = 28.8%

This spring, Crowe Lake experienced a record breaking \$3,570,000 waterfront home sale. Granted, the home was exceptional! A quick check on real estate at time of writing the MLS web pages show zero waterfront properties on the Crowe waterways for sale- and heaven knows they aren't making more waterfronts.

# The Fish That Ate Japan

By Christian Elliott,  
National Geographic, January 11, 2022

An innocent gift from Chicago to Prince Akihito in 1960 caused a decades-long ecological crisis that Japanese scientists are now close to solving.

When Crown Prince Akihito visited Chicago on October 3, 1960, his sole request was to visit Shedd Aquarium. Then Mayor Richard J. Daley, an avid angler, presented the prince with a gift that he scooped with a net from one of the tanks himself: 18 bluegills, the official Illinois state fish.

In the intervening six decades, the bluegills became an invasive, species-destroying nightmare, crowding Japanese freshwater lakes and rivers and destroying native fish biodiversity, says Kenji Saitoh, a researcher at the country's Fisheries Resources and Education Agency. By 1999, the bluegill had colonized all freshwater ecosystems in the country, spurring government-supported research into bluegill dispersal. But by then, it was way too late.

Ongoing research led by fish geneticist Hiroyuki Okamoto focuses on "gene-induced suppression for alien populations" using the gene editing tool CRISPR-Cas9. Okamoto's team sequenced the bluegill genome and recently produced first-generation male fish that could carry a female-specific sterile gene into the wild bluegill population, eliminating their ability to produce eggs. The program is in its sixth year in the lab.

"While we are aware of the genetic methods designed to disrupt the reproduction of bluegill, we remain cautious of the potential impacts on native ecosystems and their relations in law and regulations," Masaki Ohara, section chief of the International Strategy Division of the Japanese Ministry of the Environment said in an email.

Across the globe in Illinois, where Japan's bluegills originated, Kevin Irons is dealing with an invasive species of his own: Asian carp. As aquatic nuisance species program manager at the Illinois Department of Natural Resources, he oversees mass capture efforts to remove 750 tons of carp along the 330-mile length of the Illinois River Basin each year.

As the decades have demonstrated, whether a Japanese prince takes a souvenir tank of bluegills home or a U.S. farmer imports silver carp from eastern China, as with any human environmental intervention, good intentions aren't always good enough.

# Management Guide For Homeowners

## Spongy Moth Management Guide For Homeowners

This Guide is a product of the University of Wisconsin-Madison Division of Extension to deal with Spongy Moth infestation (Spongy Moths formerly known as “gypsy moths”). The Guide’s original one-year format has been broken into 4 articles to fit the CLWA Newsletter seasonal schedule starting with Summer 2022 and running through Spring 2023. The original Guide is at <https://fyi.extension.wisc.edu/gypsymothinwisconsin/pest-management-2/management-guide-for-homeowners>.

### MAY–JUNE: Apply insecticides.

If you choose to use pesticides to control spongy moth (*Lymantria dispar*) caterpillars, they must be applied at this time. There are two options: biological and chemical pesticides. For assistance in applying insecticides, consider contacting a certified arborist.

**Biological pesticides.** The most common treatment used against *Lymantria dispar* caterpillars is a spray of *Bacillus thuringiensis*, commonly called Bt. This biological pesticide is highly specific, meaning different varieties of Bt affect only very specific species. *Bacillus thuringiensis kurstaki* (Btk) is the certain strain that must be used to control spongy moth.

This bacterial insecticide kills caterpillars that eat it within a week of its application. Bt causes the cells of the caterpillar’s stomach lining to rupture. Bt is found naturally in soil and degrades within a week when exposed to sunlight. The variety of Bt used against spongy moth only affects caterpillars of moths and butterflies that feed on treated leaves. Bt has no affect on animals, birds, people, or even other insects. It is sold under various labels (Dipel, Foray, and Thuricide, to name a few). Bt must be applied to trees in May when caterpillars

are less than 1/2-inch long. Timing is critical as Bt is significantly less effective on older/larger caterpillars.

**Chemical insecticides.** Numerous insecticides are registered as being effective against spongy moth caterpillars in Wisconsin. Many products are available at your local garden center or nursery. Check the label to make sure spongy moths (formerly known as “gypsy moths”) are listed. Bifenthrin, carbaryl, zeta-cypermethrin, and permethrin are the commonest active ingredients and are available in several formulations. If you elect to use a chemical insecticide, consider the potential impact on beneficial insects and natural enemies such as predators, parasites, and honeybees. ALWAYS read and precisely follow the label directions.

### EARLY JUNE: Replace barrier bands with collection bands.

Collection bands can be made from medium-weight, neutral-colored cloth or burlap approximately 12–18 inches wide and long enough to completely wrap around a tree. Using a piece of cord or twine, fasten the middle of the cloth band to the trunk at chest height. Fold the top half of the cloth down to cover the bottom half. Older caterpillars are attracted to these “skirts” when

looking for a place to hide during the day. Remove and destroy the caterpillars each day by scraping them into a bucket of soapy water.

Monitor the burlap bands for caterpillars each day in the late afternoon and sweep any collected caterpillars into a bucket of soapy water.

Summer

Fishing Time?

2022

*At chest height, wrap a 12 – 18 inch tall piece of burlap or light colored cloth around the tree and fasten it with twine around the middle.*

Photo Credits: Bill McNee, WI DNR.

### **JULY: “Crush & brush” pupae and adult females**

Spongy moth (*Lymantria dispar*) is immobile during its pupal stage and can be crushed or brushed into a container of soapy water to prevent them from making it to the adult stage. If caterpillars have been abundant in your area, do some thorough scouting to check for the brownish pupae (3/4 – 2 1/2 inches long), which are often tucked away in protected spots. Adult spongy moths appear within two weeks. Adult females (pale colored) have limited mobility and can also be crushed or brushed into a container in soapy water. Since each female can easily lay upwards of 1,000 eggs, eliminating adult female moths could help prevent future problems!

Spongy moth adult male (left) and female (right)

*Lymantria dispar* Pupae

*Drop the top half of the burlap over the twine and over the bottom half of the burlap to create a “skirt”.*

### **AUGUST—SEPTEMBER: Watch for pinholes in egg masses.**

Pinholes indicate the presence of the tiny parasitic wasp *Ooencyrtus kuvanae*. These wasps do not sting humans but will attack spongy moth (*Lymantria dispar*) eggs as long as the weather is above freezing.

# 2022 Municipal & School Board Elections

(Press Release from M&L)

This notice is for anyone proposing to be a Candidate in the 2022 municipal and school board elections on October 24, 2022. Nominations must be filed on the prescribed form available in person with the Returning Officer during normal office hours between the first business day of May in 2022 to Thursday, August 18, 2022, and between 9:00 a.m. and 2:00 p.m. on Friday, August 19, 2022 (Nomination Day). Please make an appointment with the Returning Officer to file your nomination.

Each proposed candidate must file the prescribed declaration form signed by at least 25 persons (School Board candidates are exempt). The required filing fee for the Head of Council is \$200.00 and all other offices are \$100.00,

which shall be paid by cash, debit, certified cheque or money order made payable to the Municipality of Marmora and Lake.

Candidates must not spend or raise any funds for their election campaign until the registration/nomination form has been filed. Full details on the procedures to be followed may be obtained from the Returning Officer. Go to our elections page for more info!

## Marker Buoys

### Marker Buoys Placed For Safe Summer Boating

Jeff Alderson has placed about 30 marker buoys on the lake and river. Boaters are reminded to use caution around the markers and to stay at least 50 feet from them. Boaters should also be very cautious, especially at night, for floating debris and the floating bulrushes. If you have brake rotors or bleach bottles for Jeff, contact us by email at [info@clwa.ca](mailto:info@clwa.ca).

**Disclaimer:** The Crowe Lake Waterway Association (CLWA) assumes no responsibility for the accuracy or completeness of these or other hazard markers. Their installation and maintenance is solely an assist to safe boating. Boaters are still required to exercise caution in respect to water depth and unforeseen hazards.
